TB Treatment

Juliette

Weight = 3796lbs

4/6/99 Started Isoniazid (INH)

**4/6/99 – 7/15/99 - 28, 300mg INH tablets (Rectal)
7/16/99 – 7/30/99 - 28, 300mg INH tablets (ORAL)
7/31/99 – 12/8/99 -14, 300mg INH tablets (ORAL)
12/8/99 – Last day of Treatment**

4/1/99 Started Rifampin

**4/1/99 – 60ml (Oral)
4/2/99 – 5/6/99 – 50mls (Oral)
5/7/99 – 11/19/99 - 60ml (oral)
11/19/99 – Last day of Treatment**

Took blood levels for medication absorption (National Jewish Center):

4/28/99	INH levels	@ 2hr	1.42
		@ 4hr	0.8
		@ 24hr	Trace
	Rifampin levels	@ 2hr	3.34
		@ 4hr	3.09
		@ 24hr	0.79
5/12/99	Rifampin levels	@ 2hr	3.15
		@ 4hr	2.45
		@ 24hr	0.34

ANIMAL VETERINARY REPORT

Page 1 of 1

Species: Elephas maximus.
Common Name: Asian Elephant.
Sex: F.

Unit: Polk.
Name: Juliette.
Date of Birth: 12/30/1992.

MEDICAL HISTORY

12-31-92 TAT
12/15/93 DW fenbendazole/os
1/9/94 DW febendazole/os
12/3 tetanus toxoid
2/22/95 IV w/eqvalan
11/21/96 tetanus toxoid
12/10 tetanus toxoid, feet, DW Ivermectin, fecal-neg for ova
1/27/97 fecal neg for ova
2/12 lame LF, 3 Adequan IM, 4 Ibuprophene bid
6/13 cultured for TB
8/19 recultured for TB
8/21 corneal scratch, Chloramphenical BID x 3 days
9/18 3rd culture for TB
1/24/98 20 tabs TMS as preventative x 5 days
5/13 & 6/7 visited animal compound & observed at Mexico City(wal)
6/9 visited animal compound & observed at Laredo, TX(wal)
7/18 visited animal compound & observed at Houston, TX(wal)
8/22 visited animal compound & observed at Colorado Springs, CO(wal)
10/3 visited animal compound & observed at Buffalo, NY(wal)
10/30 HX: Young animal, DOB 1992 @ Williston. Has been treated rectally with INH for presumptive TB. Treatment lasted approximately 1.5 years(ri)
11/4 visited animal compound & observed at St.Louis, MO(wal)
11/12 visited animal compound & observed at Tampa, FL(wal)
11/18 unsuccessful trunk wash (ri)
12/1 left Red Unit for CEC

END OF REPORT

FELD 0007068

Juliette, cont.

2/16-20/01 On site, All animals look good (wal)
2/16/01 Interdigital dermatitis especially front feet.
RX: topical Panalog (wal)

2/23/01 WT=4664

3/21/01 HX: Moisture and itching between the toes of the front feet.
PE: BAR. Good BC. Feet look generally normal with no areas of inflammation. The cuticles are mildly overgrown, with possibly a few areas of chronically moist skin.
LB: Collected a sample of moist cuticle for DTM culture.
A: Moist dermatitis of unknown cause. Itching and location suggests fungal (athletes foot).
RX: Instructed handler to clean feet daily (conservative TX for now) If itching is observed again, consider antifungal medication (tinactin) (ri)

3/29/01 Stiff right front leg when she woke up. Stiffness faded and went away after walking her.

4/11/01 Survey radiographs taken of forefeet digits 2-5 (cs)

4/12/01 Handler reports interdigital dermatitis has resolved (cs)

4/14/01 FOOT RADIOGRAPHS: Likely normal survey radiographs of digits 2-4 of both forefeet. Notable radiographic findings include radiolucent lines running transversely across proximal 1/3 of P2 of several toes (growth plates?), and lucent lines across lateral "wings" of P3 of both 3rd digits. (cs)

5/3/01 On site (wal)

5/8-10/01 ON site in Springfield MO (wal)

5/15/01 ON site in Rockford IL (wal)

5/01 ON site everyday the Unit was in Madison WI (wal)

5/23/01 Routine corneal exam - Normal (cs)
AVID# 033*558*616 (wal)

6/14/01 Woke up with a stiff front left leg

6/15/01 Stiff front left leg

6/16/01 Front left leg still stiff but much better

6/17/01 Stiffness gone

6/26/01 Stiff back legs both sides

6/27/01 Still a little stiff - ON site in Pensacola, FL (wal)

6/28/01 No notice of stiffness in back legs, feeling better (wal on site)

7/17/01 On site in Houston TX
HX - No problems reported
PE - BAR. Good BC.
LB - Fecal collected for routine Salmonella culture
A: Normal exam (ri)

8/9/01 On site in Dallas TX (cs)

8/23/01 On site in Colorado Springs CO (ri)

9/27-28/01 ON site in Buffalo (wal)

10/4-5/01 ON site in Detroit (wal)

10/25-26/01 On site in Bridgeport (wal)

11/1-2/01 ON site (cs)

11/8-9/01 On site (cs)

11/15/01 WT=4860

11/20/01 Transferred to the CEC for W/Q

11/25/01 Trunk wash (cs)

11/26/01 Trunk wash
VACC: Tetanus toxoid (Fort Dodge, serial # 277324B, exp. 19Mar.03), 1cc IM left triceps region. Imrab 3 (serial # 12409, exp. 19Jul.03), 4cc IM right triceps region. (cs)

11/27/01 Trunk wash
TESTS: Blood drawn for routine CBC, chemistry panel and serum banking. Feces collected for flotation and sedimentation. (cs)
